

ГРУППА **PALFINGER** Bashkortostan republic

PALFINGER - the company was founded in 1932, and today is the international leader and innovator in the field of hydraulic lifting equipment production.

The history is conditionally divided into three key periods: the beginning, the era of cranes and the period of expansion of the company. Today PALFINGER is an international group that is always close to the customer, regardless of its location.

All over the world PALFINGER offers the most innovative, reliable and efficient solutions in the field of lifting equipment for use on commercial and maritime transport. Thanks to our technological developments and experienced personnel, we set standards in the industries we work in.

Flexibility and professionalism in production, as well as a global sales and service network, provide us a decisive competitive advantage, and our customers PERFECTION OUT OF TIME.

Heating of industrial building

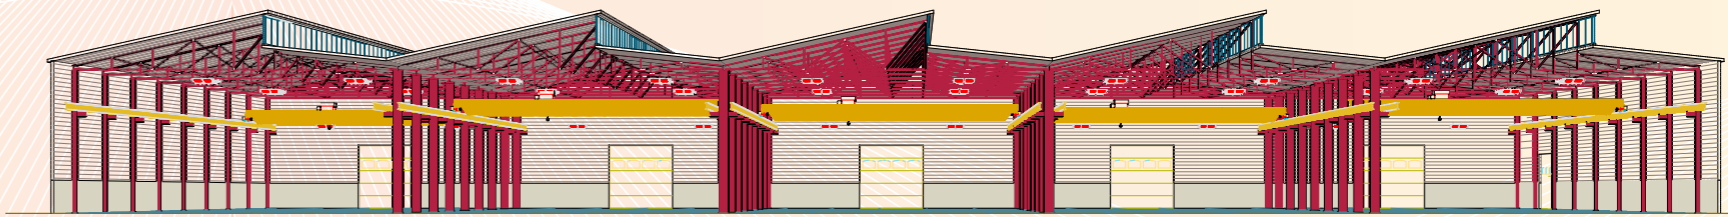

PALFINGER in Russia

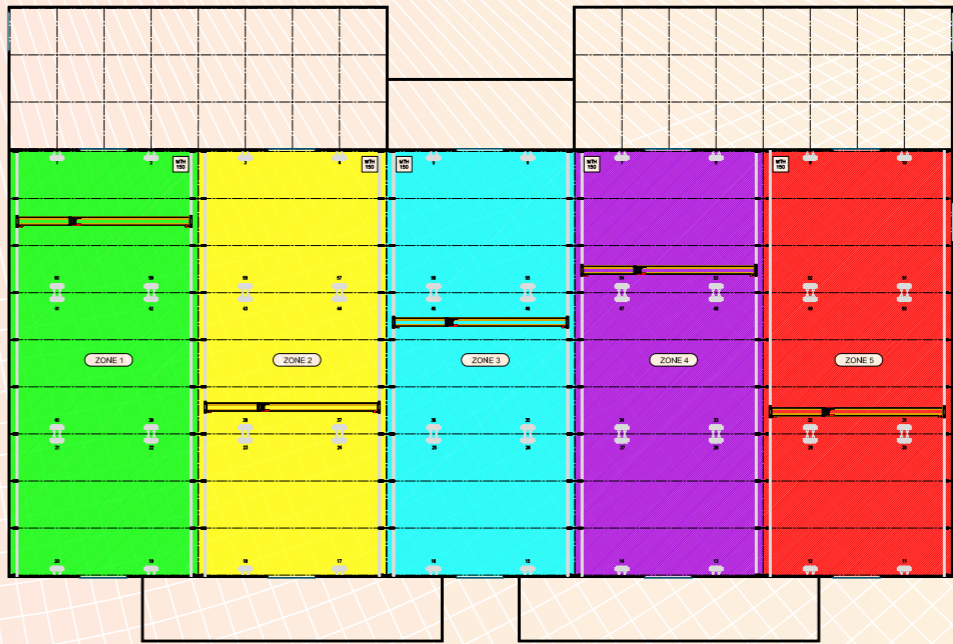

Characteristics of the SBM heating system

- > High-performance ceramic heaters
- > Two-speed heaters
- > 6 independent heating zones, with annual temperature programming

PROJECT SPECIFICATIONS	
Heated area	6480 m ²
Total installed capacity	1236 kW
Average height of the building	8 m / 10,5 m
Comfortable temperature	+18°C / -26 °C
Ceramic heaters SBM type	60 XFR 64
Temperature control	6 MTH 150
Energy	Natural gas G20
Installation date	2014

Gas ceramic heaters with increased efficiency - Model XFR 64

ADVANTAGES OF SBM GAS CERAMIC HEATERS

- ✓ Energy savings
- ✓ Increased productivity
- ✓ Reduced maintenance costs

TESTIMONIAL

About the factory

JSC "INMAN" is the largest Russian manufacturer of crane manipulators of different carrying capacity. The initiators of the establishment of the company were oil companies, which are in need of CMU of domestic production. Since 2011, the company is part of the Austrian concern PALFINGER, a recognized world leader in the field of mobile lifting equipment.

PAFINGER invested heavily in the creation of new production facilities of the plant in Ishimbay. Over the past years, the company has successfully developed and launched several series of reliable rope and articulated crane manipulators capable of efficiently operating even in harsh temperature conditions from -40 to +40.
