| Energy | Propane gas G31 |

► Characteristics of the SBM heating system

- > High-performance ceramic heaters
- > Two-speed heaters
- > 3 independent heating zones, with annual temperature programming

► Installation plan

ADVANTAGES OF SBM GAS CERAMIC HEATERS

- ✓ Reduced maintenance costs
- ✓ Increased productivity
- ✓ Energy savings

TESTIMONIAL

We are very glad.

After installation of the SBM infrared heating system in the production departments of our enterprise, we can note the following main advantages :

1. Completely to abolish the manual lab or of the stocker of solid fuel boilers, the place of storage of swan timber was cleared.
2. Automatic maintenance of a constant temperature regime, according to the technological process.
3. Cost-effective maintenance of the necessary minimum temperature for trouble-free switching on of equipment, CNC machine tools after idle time.
4. Zonal maintenance of the set temperature made it possible to make the heating process even more economical.
5. High quality of heating equipment.

Chief power engineer of "Everlast" Ltd., Odessa,
Mr. Filin Alexander.
